COWPEA SEED

COWPEAS FOR SEED, HAY AND SOIL IMPROVEMENT

Every planter of an orchard ought to make use of some legumes to fill his soil full of nitrogen for the use of his trees. Almost always Cowpeas will be the best legume to be found. They can be put in among other crops, the tops harvested or turned under. As a cover-crop, mixed with some oats, they are fine. The market prices change so much and so often that we cannot quote prices; but write us when you want some and we will quote, or, tell us in your order how many you need, and we will make them lowest market rates.
